РЕЗЮМЕ

У статті досліджено функції конкуренції як цінового регулятора на ринку, причини її виникнення та критеріїв забезпечення. Виконання поставлених вимог та уникнення диспропорцій дасть змогу на зближення української конкурентної політики з світовими аналогами.

Ключові слова: цінове регулювання, конкурентна політика, конкуренція

РЕЗЮМЕ

В статье исследованы функции конкуренции как ценового регулятора на рынке, причины ее возникновения и критерии обеспечения. Выполнение поставленных требований и избежание диспропорций даст возможность на сближение украинской конкурентной политики с мировыми аналогами.

Ключевые слова: ценовое регулирование, конкурентная политика, конкуренция.

ABSTRACT

The article investigates the functions of price competition as a price control in the market, its causes and guarantee criteria. Fulfillment of the requirements and avoiding distortions enable convergence Ukrainian competition policy with global analogues.

Keywords: price regulation, competition policy, competition

STATEMENT OF THE PROBLEM

The world's practice and experience of economic developed countries all over the world show necessity of creating controlling instrument of competition and avoiding price discrimination, or rather rulemaking that encourage enterprises to establish their rules of the game based on competition and in any manner defend their interests.

Each of the market participants follow their own discovered conception of marketing strategy based on their own capabilities and market performance.

Price control issue in the market investigated by a number of scientists starting from A. Piga who introduced a concept of price in the market. Later J. Berman, P. Doyle, F. Kotler, T. Nagel, A. Grytsenko, V. Korenev, V. Tatasevych, L. Shkvarchuk, etc. expressed their own ideas in this issue. Authors of scientific researches concerning price formation are K.O. Buzhymyska, I.L. Erukhymovych, O.V. Kolesnykov, V.L. Korineva and such economic maestros as A. Smith, D. Ricardo, A. Marshall, D. Acemoglu, E.D. Beinhocker, etc. But the issue of place of price formation policy in regional economic system in competitive environment was not considered a lot. Therefore it provoked option of research subject.

The purpose of this article is exploring the competition functions as a price control in the market, reasons of its formation and guarantee criteria.

THE MAIN MATERIAL OF RESEARCH

During centrally-controlled economy competition role came to nothing because of target control in economizing process. Besides, an emphasis was put only on negative effects of competition for a long time such as seizing a market by large entities, rich quick programme by some companies and possible bankruptcy of others, appearance of various social compositions of society due to differential satisfaction of needs, unemployment rate increase, etc.

It appeared owing to planning and administrative way of economizing absence of liberal access to capital goods. The main users of capital goods were large state entities. However they also did not have free choice but used only those things that had liberal access and were in quantity that they were allowed by plans and guidelines. In this case there was no sense to speak about entrepreneurship and free development of economic activity. Manufacturers created resources deposits pulling out of the market that influenced negatively on efficiency of economic activity.

On the other hand, competition has much more advantages than disadvantages which appear in its functions:

– competition provides complete interrelation with buyers and sellers, i.e. it is an instrument of attaining balance between production and consumption, demand and supply on outputs creating herewith favorable price for each part;

- it affects combining interests of all parts of production process and subjects individual intentions of economic activity subject to public interests;
- it encourages manufacturers apply innovations of scientific-technical progress for creating a new product or product differentiation depending on personal needs of a group or certain consumer;
- it makes manufacturers search ways of production cost production that is being produced for getting cost advantages in the market;
- it creates market price providing balanced proportion between social needs and social production.

While functioning, competition influence on production efficiency spontaneously, increasing its technical level, providing quality improvement and product differentiation [1].

Reasons of price competition appearance have to be investigated for thorough understanding of its action.

The first reason of its appearance is presence of big quantity of sellers in certain market of goods or services. They begin competing with each other for getting favour of consumers while decreasing its own price [5].

The second reason is freedom of choice in economic activity. Owing to this each manufacturer selects product, its quantity and quality.

The third reason is satisfaction of balance between demand and supply (avoiding deficit and excessive production).

The forth reason of competition appearance should be considered as presence of production goods market. In competitive struggle determining of high profit rate is very important that is target in choosing of economic activity. However selection of activity determines only possibility of production. For turning it to reality it must be changed into production goods having money capital [6].

The history of competition policy in Ukraine began just after proclamation of independence from the Soviet Union in February 1992 when within attempts of creating market economy the first Competition Act was adopted.

Antimonopoly Committee of Ukraine (AMCU) created in 1993 for providing competitive legislative execution, now is responsible for observation of two laws that are the result of development of initial competitive legislation: "Economic Competition Security Act of Ukraine" (2001) that is the main instrument of using competitive legislation in Ukraine and "Unfair Competition Security Act of Ukraine" (1996) that concerns actions of certain subjects of economic activity aimed at exploitation or damage to competitiveness of other subjects of economic activity [2].

Competitive legislation of Ukraine is developed from the European competitive laws, but their accepting and practicing is a part of constant attempts of Ukraine aimed at integration to western markets. In particular Ukraine intends to join the European Union, but one of the conditions of joining is providing of efficient competitive legislation system [3].

Thus, for instance, the main trend is propaganda among citizens concerning protection of competitive advantages of manufacturers and specifying their blame for law violation. For that purpose both mass media and social organizations must be involved and thematic round table and seminars for specialists must be held as well. The main consumers of such information can be organizations of specialists in certain sphere (trade unions, manufactures of particular direction association, chambers of commerce, etc.).

In modern reality of the Ukrainian economy the main benefit for competitive advantages protection is putting into action principal theses of competitive legislation which would show not only economic but social effect. For that purpose Antimonopoly Committee of Ukraine should be empowered more, in particular regarding anticompetitive behavior ban of officials and executive authorities as well as carrying out an expertise of approved legislative concerning influence on competition in certain branch or market in general.

However nowadays Antimonopoly Committee finds difficulty in lack of concentration in performance and presence of a great deal of authority obligations and governance support. It is the most noticeable in the natural monopoly markets where Antimonopoly Committee makes efforts on rebalancing and providing market regulators [7].

For improving the situation controlling agencies (Antimonopoly Committee first of all) should use efforts for consumer right protection and easing barrier to market of potential competitors access that results in restriction of price control, reducing of administrative, economic and financial privileges for natural monopolies, elimination of local government body authority concerning interfering into economic activity of enterprises.

Control over monopolization and concentration degree on regional goods market must be carried out by means of state monopolistic organization frameworks downsizing and dividing of functioning monopolistic organizations [3].

According to the investigations made by Razumkov Centre it was found out by on the average 40 per cent of the asked chiefs in industrial branch, 15 per cent of the chiefs in agricultural sector and about 75 per cent of the chiefs in communication and intercommunication lines were in favour that competition as an important leverage over efficiency of enterprise economic activity in the market.

Low level of competition development is testified by scientific research data as well, according to which for the last years in the goods markets with limited capacity for competition development more than 50 per cent of production volume is disposed. Including completely monopolized markets - more than 7 per cent, a dominating company market – almost 28 per cent, several dominating companies market – more than 15 per cent [4].

The main reasons of low level of competition development in the Ukrainian market are:

- imperfect conjecture in the regional and national goods market;

- high barriers for entering the markets that do not keep out new entrants of the market;
- non-development of the market conjecture that does not allow to enter financial-credit and government institutions;
- lack of truthful information (especially in nature monopoly markets);
- creating of legislative conditions for approaching competitive support instruments between Ukraine and the European Union;
- providing interaction between government body and non-public organizations that continue innovative, investing, price activity and protect consumers' rights.

CONCLUSIONS

Thus above-mentioned reasons are determinative while enforcing the monopolistic markets control policy (including nature monopoly markets) however creating case for price and tariffs control performance without self-interest but taking into account only production efforts; determining right of use resources and production goods, providing following rules of legal state and principles of freedom of choice.

Applied Geometry, Engineering Drawing, Ergonomics and Safety of Life
Machines and Mechanical Engineering
History of Science and Technics
Electrical engineering, Radio Engineering, Telecommunications, and Electronics
Information, Computing and Automation
Mining and Geodesy Sciences
Metallurgy and Energy
Chemical Technology, Chemistry Sciences
Technology of Food Products
Technology of Materials and Products Textile and Light-load industry

Machinery in Agricultural Production
History of Art
Project and Program Management
Innovative Technologies
Repair and Reconstruction
Materials Science and Engineering
Engineering Physics
Mathematics & Applied Mathematics

REGIONAL DEVELOPMENT AND INFRASTRUCTURE

History of tourism
Theoretical and methodological foundations of tourism and recreation
Tourist market , its current state and development forecasts
Training and methodological support

ECONOMIC, MANAGEMENT & MARKETING SCIENCES

Economics and Management of Enterprises
Economy and Management of a National Economy
Mathematical Methods, Models and Information Technologies in Economics
Accounting, Analysis and Auditing
Money, Finance and Credit
Demography, Labor Conomics
Management and Marketing
Economic Science
